AVPro

It's a DVD Decade!

Millions of people have been watching DVD, but few of them really enjoying with, unless have home theater system. All DVD video contents come with excellent video quality, and numerous 5.1 channel sound as well, either in Dolby Digital AC-3 or DTS. Due to space issue, noise consideration, not many people are affordable to adopt a 5.1 home theater system. PDVD-9208 is an innovation product, designed to let you can be very ease to enjoy these numerous sound from front left to right, from rear right to left, from center, from subwoofer as well, while you watching DVD. PDVD-9208 is 5.1 channel headset system. PDVD-9208 comes with a well-designed headset, an amplifier and CyberLink PowerDVD 5.0 DVD playback application.

With advanced headset sound positioning technology (AHSP), PDVD-9208 headset equips with total 8 speakers (2 for front, 2 for real, 2 for center and 2 for subwoofer with vibration) and each sound comes clearly with excellent quality, even these speakers are around ears. It's a real 5.1 sound quality, not any simulation headset can compete with. There is a 4-in-1 volume adjustment controller within headset's core which let you ease to adjust volume for any one of 5.1 channel.

With its unique amplifier, PDVD-9208 can connect with home DVD or PC DVD, and also can output to other 5.1 speaker amplifier. You can watch your DVD video either at living room or in front of PC. Even you already have a home theater system, PDVD-9208 is exactly a complementary solution to this home theater while you don't want to be noisy. PDVD-9208 also provides user USB power port that you might using PC power to playback DVD without adaptor.

Best yet, PDVD-9208 bundles with worldwide leading DVD playback application, CyberLink PowerDVD 5 OEM version. With CyberLink technology, CLEV /CLPV bring you better quality for DVD video. On the other hand, You might leverage CyberLink technology, CLMEI, encode 2 channel audio sound into multiple-channel, it means you can now playback MP3 audio files, audio CD tracks, with 2 channel encoded audio tracks in multi-channel virtual surround sound, and enjoying with 5.1 channel sound from PDVD-9208 headset.

Software Applications Bundled & Features

CyberLink PowerDVD 5 OEM version with AC-3 and DTS.

CLEV™ (CyberLink Eagle Vision)

CLEV™ is a new revolutionary technology that intelligently adapts video contrast and colors across the scenes in a movie to deliver superb and rich details. CLEV™ also helps to alleviate the problem where some movie scenes are too dark or bright by adjusting the color and contrast to bring you the best image possible. It is also ideal for correcting detail loss inherent in LCD/CRT monitors.

CLPV™ (CyberLink Pano Vision)

CLPV™ is a new non-linear stretching technique, that can display 4:3 films on widescreen displays (and vice versa) with very little distortion. To reduce distortion CLPV™ only stretches the video image on the edges and does not affect the main/center portion to maintain natural look of the film. With CLPV™ you can view any movie you want in the correct aspect ratio for your display device, even if the original movie doesn't support it.

CLMEI™ (Multi-Channel Environment Impression)

CLMEI™ is a proprietary audio technology developed by CyberLink that delivers multi-channel audio from any two-channel encoded audio track. This means, if you have a multi-channel speaker system, you can now playback MP3 audio files, audio CD tracks, and DVD movies with 2 channel encoded audio tracks in multi-channel virtual surround sound.

PDVD-9208 Product Specification

Amplifier

Audio Frequency Input:

- > AUX Connect Jack (Stereo Jack) 1 set
- > DVD Connect Jack (5.1 Channel Input) 1 set

Audio Frequency Output: 6 Channel Output 1 set

Frequency Response:

- > Front Rear Center 20-20KHZ
- > Subwoofer 20-120KHZ
- > S/N Ratio ≥80 dB
- > Separation ≥60Db
- > Distortion < 0.5%

Output Power : 500mw X 6

Input Power : DC7.5V/ 500mA

USB Power : 5.0V 500mA

Volume : 90 x 155 x 143 mm

Headset

Front Speaker : Φ30mm dia. Dome X2 32OHM

Rear Speaker : Φ23mm dia. Dome X2 64OHM

Center Speaker : Φ23mm dia. Dome X2 64OHM

Subwoofer Speaker : Φ30mm dia. Dome X2 8OHM Vibration Function

Cord Length : 4 meters

Full Set

Weight : 1.5KG

System Requirement & Recommended

Connect to PC

- > Intel Pentium III (Recommend: Pentium 4) or any Althon processor
- > 128 MB RAM or above
- > Audio device with 5.1 channel output
- > DVD-ROM, DVD-R/RW, DVD-RAM, or DVD+RW
- > Display card supporting DirectDraw overlay
- > A USB port (While using USB Power)
- > Windows 98SE, ME, XP, 2000

Connect to DVD

- > A DVD player with Dolby Digital AC-3 or DTS decoder

Connect to home movie theater

- > A amplifier with Dolby Digital AC-3 or DTS decoder

PDVD-9208 Standard Product Offering
